

RAD.

Cassie Radstaak is a graphic designer from Southwestern Ontario. After graduating from the University of Ontario Institute of Technology with her Bachelor of Education she pursued the vocation of teaching. After a few years of teaching she decided to experience all of the opportunities the world had to offer. She worked for a furniture company and was a background actor but she kept coming back to what she loved - design. In the summer of 2009 she decided to pursue it by beginning her Certificate of Digital Arts at George Brown College. Cassie is not your typical graphic designer but she comes with a different perspective, enthusiasm and an eagerness to learn. She has experience with Illustrator, Photoshop and InDesign as well as more hands on and D.I.Y. techniques.
