

CYRILLE MARTINI

PHOTOGRAPHER

Luxembourg

Italian-French, self-autodidact photographer, truly passionate about the image, I have always had a pencil and brush in my hands when I was young.

Computer scientist by profession, it is in 2012 that I decided to buy my first real camera and started to invest myself in photography.

I started with landscapes photos, the portraits of friends and finally Staging.

My style has evolved with my experiences, which led me to perfect my technical approach to photography.

Today, architecture, fashion and portrait, street photography and staging have become my favorite areas.

In addition to my personal projects, I have also collaborated with some companies (EditionBougainville, Protech Monte-Carlo) for which I directed staging and photography for their catalogues and magazine (AD, IDEAT, Residence Decoration, Côté Paris, Côté Sud, The World of Interiors, Lamasat Dubai, Intersection).

I attach great importance to post-production, which is in my opinion the most artistic and personal part of Photography.
