NEWBORNS BETWEEN 3-10 DAYS OLD ONLY.

We will take anywhere from 1 - 2 hours in our newborn session. This includes enough time to pose the baby, nurse if hungry, change the baby, change backdrop and pose again. We can't go over 2 backdrops/props because the baby will get very uncomfortable and fidgety. The main thing we MUST have for this session is patience, it can take upto 30 min to pose a newborn for one shot if he/she isn't cooperating. Please come with ideas in mind, anything you would like to try. Please have extra diapers, formula or pumped milk, and any outfits you would like (even though newborns are mostly naked). Please, we can not rush through these pictures, have patience.

A DAY IN THE LIFE -

\$300

includes 2 hours of capturing you and your loved ones in your daily routine. Sounds a little crazy right ? At first I thought so as well, but going through my daily routine I realized it would be

amazing having a picnic with my children and all of a sudden having somebody to capture it without making it a formal photo shoot. If you want to capture your kids first time at the zoo, beach, a regular day having fun at a park, a memorable date, even a day at home relaxing. You get all images on a downloadable gallery with 10 of the best images digitally retouched.
