Prints on Wood

Prints on Wood are a large-format printing company that specialize in creating wood prints for artists. They have perfected the process of printing custom artwork and photos directly on wood. Printed on 3/4" (18mm) birch wood. Available in select sizes and finish types. Ready to hang out of the box. I have the Catherine Swenson collection in Prints on Wood, and have five of these artworks selected for their "Fine Art Collection".

Displate

I have a shop in Displate, which is a manufacturer specializing in creating exceptional Metal Posters. Steel used in the manufacture of the metal posters is thick and resistant to atmospheric conditions that guarantees durability and gives certainty that the Displates will serve you forever. The unique mounting system with a magnet is extremely easy to use and permits any arrangement of the artworks in the interior.
